6211-13 ADSL2+ Router

Quick Installation Instructions

Document Number 6211-A2-ZZ12-00

September 2006

Installation

1. Connect your ADSL line to the port labeled **LINE** on the rear panel of the device.
2. For routers with a phone port, optionally connect your telephone to the port labeled **PHONE**.
3. Connect your PC or a LAN:
 - Use the supplied Ethernet cable to connect your PC directly to the router. Connect one end of the Ethernet cable to the port labeled **LAN** on the router and connect the other end to the Ethernet port of your computer.
 - Alternatively, use the supplied USB cable to connect your PC directly to the router. Connect one end of the USB cable to the port labeled **USB** on the router and connect the other end to a free USB port on your PC. Install the USB drivers as described in the user's guide on the CD.
 - If your LAN has more than one computer, you can attach one end of an Ethernet cable to a hub or a switch and the other to the LAN port of the router. Either a crossover or straight-through Ethernet cable can be used.
4. Connect the AC power adapter to the **POWER** connector on the back of the device and plug the adapter into a wall outlet or power strip.

See the user's guide on the CD for important safety instructions and more information.
